OB Anesthesia L&D Epidural Adult Subphase

Vital Signs/Monitoring

Notify Provider
- Notify OB Anesthesiology Resident, if Ephedrine or Phenylephrine is given.
- Notify OB Anesthesiology Resident, if patient experiences loss of analgesia or progressive motor block.
- Notify OB Anesthesiology Resident once the Patient has delivered to discontinue previous Anesthesia orders.
- Notify Provider Vital Signs
  - Notify Provider and Respiratory Therapy if, RR < 10/minute

Vital Signs
- Basic Vital Signs | Blood Pressure-Cuff, Q10MIN, 30, minute, Monitor BP q2min x30 min with initial dosing and then return to routine vital sign monitoring per L&D Admission Orders.
- Vital Signs | Blood Pressure-Cuff, Q10MIN, 20, minute, Monitor BP q2min x15 min with subsequent re-dosing and then return to routine vital sign monitoring per L&D Admission Orders.

Activity
- Bedrest, Constant Indicator

Positioning/Pressure Reducing Device
- Other, Specify in Special Instructions, Patient to remain with uterine displacement once epidural established. If patient on epidural continuous infusion, have patient alternate lateral tilt q60min to prevent unequal/unilateral blockade.

Nursing
- Patient Alert Card
  - Place epidural/intrathecal alert card above patient's bed and on chart.
- Urinary Catheter Insertion
  - Indwelling Catheter, Bedside Drain, ONCE
- Urinary Catheter Maintenance
  - Indwelling Catheter, Bedside Drain, PRN Order
- Peripheral IV Insertion
  - Peripheral Venous IV, Maintain IV access by continuous IV or saline lock
- Suction
  - Oral Suction, PRN Order

Continuous Infusions
- LR BOLUS IVF
  - 500 mL, IV, Injection, ONCE (DEF)*
    - Comments: Prior to epidural placement
  - 250 mL, IV, Injection, ONCE
    - Comments: Prior to epidural placement
  - 1,000 mL, IV, Injection, ONCE
    - Comments: Prior to epidural placement
- LR BOLUS IVF
  - 250 mL, IV, Injection, PRN, PRN Other (see comment)
    - Comments: Hypotension; If patient is unresponsive to position change, then give fluid bolus

Medications
- hetastarch (Hespan) 6% in normal saline IV
  - 500 mL, IV, Injection, ONCE
    - Comments: Prior to subarachnoid block/ epidural placement
- Bicitra oral liquid
  - 30 mL, PO, Liquid, ONCE
    - Comments: Give immediately prior to epidural placement.
- ePHEDrine 5mg/mL dilution INJ
  - 5 mg, IV, Injection, ONCE
    - Comments: Give if mother/baby not responsive to position change and IV fluid bolus and MAP is <50 or if baby having persistent late decelerations or a prolonged deceleration if
Anesthesiologist not at bedside. Notify Anesthesiologist if given.

Phenylephrine IV BOLUS 100mcg/mL
100 mcg, IV, Injection, ONCE

Comments: Give if mother/baby not responsive to position change and IV fluid bolus and MAP is <50 or if baby having persistent late decelerations or a prolonged deceleration if Anesthesiologist not at bedside. Notify Anesthesiologist if given.

Respiratory

Oxygen Therapy

Nasal Cannula, Keep SPO2 greater/equal 90%, Improve Oxygenation (DEF)*
Nasal Cannula, 2 L/min, Keep SPO2 greater/equal 90%, Improve Oxygenation
Nasal Cannula, 4 L/min, Keep SPO2 greater/equal 90%, Improve Oxygenation
Nasal Cannula, Keep SPO2 greater/equal 92%, Improve Oxygenation

Subphase Activated

*Report Legend:
DEF - This order sentence is the default for the selected order
GOAL - This component is a goal
IND - This component is an indicator
INT - This component is an intervention
IVS - This component is an IV Set
NOTE - This component is a note
Rx - This component is a prescription
SUB - This component is a sub phase
